PROFESSIONAL SUMMARY

Creative, analytical, and systems-driven with an academic background in Information Technology (BSIT, South Mansfield College) and 4+ years of media production experience. Specializes in taking raw scripts, voiceovers, and initial AI-generated drafts and transforming them into on business, economics, technology, and consumer behavior.

Expert in solving the core limitations of generative AI: eliminating warped visual artifacts, replacing generic clips with contextually accurate commercial stock footage, enforcing 2.5s—4s pacing resets, incorporating kinetic data charts, and mixing broadcast-balanced soundscapes (dialogue leveling, ambient room beds, and tension risers) that keep viewers watching past the 15-minute mark.
