COLORADO INSURANCE DISTRICT — 3-MINUTE MASTER LOOM SCRIPT

Audio Memorization & Edge Read Aloud Guide | Word-for-Word Target: 2:45 to 3:15 (~410 Words)

WHY THIS SHORT SCRIPT WINS: Alexa and her team review dozens of applicant videos. A 7-minute video gets skipped. A concise **3-minute video (under 420 spoken words)** proves executive-level communication, answers every prompt in exact order, and shows immediate competence without rambling.
Edge Read Aloud: Press **Ctrl + Shift + U** in Microsoft Edge to listen on loop. Acronyms (S-M-E, C-R-M, P-L-D-T) are phonetically formatted for natural human speech.

PART 1: THE COMPLETE 3-MINUTE LOOM SCRIPT (WORD-FOR-WORD)

Prompt 1: Introduction and Background [0:00 - 0:40 | ~90 words | Camera on Face]

Hi Alexa and the hiring team. My name is Allen Jenuel Olavidez, and I am based in Metro Manila, Philippines. Currently, I work as an Executive Virtual Assistant and Operations Specialist, but my foundation is four years of back-office operations in regulated industries. Most notably, I spent two full years with WNS Global Services supporting Australia's largest general insurer, NRMA Insurance. I started in personal lines sales and service across Home, Auto, and Landlord policies, and was promoted to Subject Matter Expert, or S-M-E. As an S-M-E, I owned Level 0 and Level 1 escalations, audited complex policy files, and resolved discrepancies cleanly before they ever reached leadership. I also supported Citi Financial Services, and completed three years of Information Technology coursework, giving me strong technical intuition for database logic and CRM workflows.

Prompt 2: Tech Setup and Connectivity [0:40 - 1:05 | ~55 words | Camera on Face]

Regarding tech and connectivity. My primary connection is dedicated fiber internet running over 300 megabits per second on PLDT Fiber. For redundancy, I have an active 5G mobile hotspot that I can switch over to in under thirty seconds. Both my workstation and router are backed up by an Uninterruptible Power Supply battery system and high-capacity power banks. You can count on me for one hundred percent attendance and zero surprise disconnects.

Prompt 3: Availability and Full-Time Commitment [1:05 - 1:35 | ~65 words | Camera on Face]

On availability. Yes, I have an HD webcam and noise-canceling headset ready for daily standups, huddles, or district syncs. Most importantly, yes, I am one hundred percent committed to this role full-time and long-term. I do not have, and will not take on, any other jobs, freelance gigs, or outside clients. And yes, I am fully available to work nine AM to five PM Mountain Time. Working US business hours is completely natural for me, and my home office is set up for quiet, uninterrupted focus during night shifts.

Prompt 4: CRM Platforms and Systems [1:35 - 2:00 | ~55 words | Camera on Face]

For CRMs and systems. In my insurance career, I worked extensively inside enterprise platforms. At NRMA, we transitioned from our legacy system called ORBIT to Guidewire PolicyCenter and BillingCenter. Inside PolicyCenter, I managed full policy lifecycles: processing endorsements, reviewing underwriting checklists, and logging timestamped, audit-ready case notes on every interaction. I am also proficient with Salesforce, Zendesk, Notion, and Google Workspace. My rule is simple: if it is not documented cleanly in the CRM, the work is not finished.

Prompt 5: Spreadsheets, Reporting, and Screen Walkthrough [2:00 - 2:50 | ~110 words | SWITCH TO SCREEN SHARE: Master Tracker]

Now, sharing my screen for my spreadsheet and reporting experience. Here on my screen is the Master Policy Intake and Escalations Tracker that I built. In a busy district, files arrive continuously from different agents, and without a centralized engine, missing carrier requirements and inspection audits create severe bottlenecks. This sheet gives leadership instant visibility into every file in the district pipeline. I built three core features into this workbook: First, automated aging using Date-Dif formulas and conditional formatting that flags any file pending over forty-eight hours. Second, dynamic X-Lookup formulas pulling underwriting rules and hail deductibles directly from our Carrier Matrix tab. And third, live executive KPI cards using Count-If and Sum-Ifs to track active caseload, weekly bound policies, and our ninety-four percent on-time SLA rate.

Prompt 6: Closing and Next Steps [2:50 - 3:05 | ~35 words | SWITCH BACK TO CAMERA ON FACE]

Thank you so much, Alexa, for your time and for reviewing my background. I take genuine pride in clean records, structured back-office systems, and taking operational friction off leadership's plate. My resume link is attached in my reply, and I would love to connect for a live interview to discuss how I can support your Colorado district. Have a wonderful day!

PART 2: THE 50-SECOND SCREEN SHARE ACTION PLAN (WHAT TO CLICK & POINT AT)

Time	Screen View & Action	What to Say / Highlight
2:00 - 2:15	Share **Tab 1: Executive Dashboard**	Point mouse at top 5 KPI cards (18 Active Cases, 94.4% SLA On-Time). Explain how this gives leadership instant district clarity.
2:15 - 2:35	Click to **Tab 2: Intake & Escalations Log**	Hover mouse over **Aging Column (DATEDIF)** with yellow/red highlight, then over **Carrier Portal & Deductible columns (XLOOKUP)**. Mention automated 48-hour breach alerts.
2:35 - 2:50	Briefly click **Tab 3 (Carrier Matrix) & Tab 4 (Folder SOP)**	Highlight that clean spreadsheets connect to clean folder trees so any agent can retrieve a Dec page or inspection in under 10 seconds.

PART 3: QUICK-FIRE CUE CARDS (BULLET POINTS FOR NATURAL DELIVERY)

• **1. Intro (40s):** Allen Jenuel Olavidez (Metro Manila) • 4 yrs operations in regulated industries • 2 yrs NRMA Insurance (personal lines, promoted to SME for L0/L1 escalations) • Citi Financial Services • 3 yrs BSIT coursework.

• **2. Tech (25s):** 300 Mbps PLDT Fiber • Backup 5G mobile hotspot (30s switch) • Workstation & router backed by UPS battery backup • 100% uptime, zero disconnects.

• **3. Availability (30s):** HD webcam & noise-canceling headset ready • 100% committed full-time & long-term (no other jobs or clients) • 9 AM - 5 PM Mountain Time (US night shifts are my routine).

• **4. CRM & Tools (25s):** Guidewire PolicyCenter & BillingCenter (enterprise policy lifecycle, endorsements, audit-ready notes) • Salesforce, Zendesk, Notion, Google Workspace • 'If it's not documented cleanly in CRM, work isn't finished.'

• **5. Excel Walkthrough (50s):** Show Master Tracker • Tab 1: Executive KPI cards (COUNTIF/SUMIFS, 94.4% SLA) • Tab 2: DATEDIF aging with conditional formatting + XLOOKUP carrier rules • Tab 4: Cloud folder taxonomy (searchable in 10s).

• **6. Closing (15s):** Thank Alexa • Pride in clean back-office systems & taking friction off leadership • Resume attached • Welcome live interview to support Colorado district.

PART 4: 15-SECOND FAST-FIRE BACKUP ANSWERS (FOR LIVE INTERVIEW)

• **Why back-office EA over sales?** — As an SME, my favorite work was investigating complex policy files and auditing records so management didn't have to intervene. I thrive on organization, compliance, and resolving back-office friction.

• **What do you do when paperwork is missing?** — I log it in the master tracker with an automated 48-hour reminder, timestamp the notes, and send a polite follow-up specifying the exact document needed and where to upload it.

• **How do you handle client data privacy?** — Coming from NRMA Insurance and Citi Financial, PII protection is second nature. Zero privacy breaches in my entire career. I adhere strictly to confidentiality and secure cloud storage protocols.
